

Quality goes the distance. Now with 7-year warranty.

Toshiba air conditioning, leading the way – again!

In a ground-breaking initiative, Toshiba air conditioning systems now offer a 7-year warranty in Australia.

Toshiba is so confident their air conditioners will withstand the harsh conditions of the Australian climate; they will back its reliability and quality with a 7-year warranty.

Following a comprehensive review, it became immediately apparent that the internationally multi-award-winning Toshiba products go the distance. “We have known for a long time that Toshiba systems have the respect of so many Dealers as the product you can trust. So, we thought, let's back ourselves in, support our Dealers and show them and consumers that when it comes to reliability, Toshiba product has what it takes to shape up to any contender” said John Caione, Manager Product, Marketing & Channel Strategy.

This landmark 7-Year warranty commences from 1 May 2020 for residential applications across the entire Toshiba line-up of Hi-Walls, Multi Split and Light Commercial equipment including the coveted SMMS VRF suite of products.

As a leading innovator in air conditioning, Toshiba has enjoyed many firsts in its long history: first to use Inverter technology in air conditioning; first residential air conditioner; first twin rotary and digital twin rotary compressor, to name a few and now a 7-year warranty.

Toshiba continues to deliver air conditioning solutions now and into the future with world-class quality, reliability and comfort.
